SUMMARY

I'm a front end javascript digital animator and web developer with 4 years of professional experience working in large media agencies and development departments. My proficiencies lay in front end, core technologies and the development of banner ads, javascript animations, single page apps, sites and ecommerce platforms using Wordpress. **Currently building React.js Apps.**

WORK HISTORY

Bannerboy Corporation, New York, NY — Mid Level, Creative Developer, May 2018 - June 2019

Designed and developed ad banners within industry and google's double click standards. Initiated polite load scripts, studio enablers in accordance with ad serving metrics and guidelines. Developed with best practices and principles using html5, css3, javaScript es6, greensock.js and object oriented programming. Designed and optimized assets using the Adobe Creative Suite.
